PROFESSIONAL EXPERIENCE

K2 Digital — *Full-Stack Developer*

SEP 2015 - PRESENT

Leading development of a tablet-based employee onboarding experience for a major Canadian corporation, which authenticates via their existing employee portal and saves input back to it.

Re-wrote an investment company's custom CMS in collaboration with UX experts, based on agile methodology. Led development of an automated fund reports solution using InDesign Server.

Created fully responsive & customized Drupal sites for various financial & real estate clients. Pulled property data nightly from an existing system.

Web Development Consultant

SEP 2013 - SEP 2015

Created a web-based phone campaign system to automatically connect visitors to local representatives, storing their information in NationBuilder. Any front-end technology could use the REST API.

Automated import of over 2000 pages and documents from a legacy Joomla site into NationBuilder, outputting a report of broken links.

Built API back-ends for a home appliance recommendation wizard and a spa check-in tablet application.

WebCanada — *Web Developer*

MAR 2011 - SEP 2013

Co-architected and documented proprietary CMS platform; mentored other developers on Zend Framework and SVN.

Built email campaigns engine that allowed clients to create campaigns from templates, preview, schedule blasts to large mailing lists, and graph open/click metrics.

EDUCATION

York University, Toronto — *B.A. (Hons.) Philosophy*

2010

Dean's Honour Roll; top marks in logic; tutored peers in nat. sci.

SKILLS

Node.js/Express, MongoDB, PHP, MySQL, creating & consuming REST APIs
